WATER IS IMPORTANT BUT

75% Children don't drink enough water

Decreased
Cognitive Function

Lower Energy
Levels

Poor
Concentration

PARENTS CANNOT WATCH KIDS THE WHOLE DAY

Actively worried about their children's water intake but can not remind and keep track

WATER IS BORING

Unattractive, easy to forget, love drink soda instead

TEACHERS AND SCHOOLS

Can't reliably track student water. Sugary drinks and limited monitoring cause frequent mild dehydration, reducing attention and learning

How do we develop a **fun, easy** way to encourage **adequate water consumption** amongst the **children**?

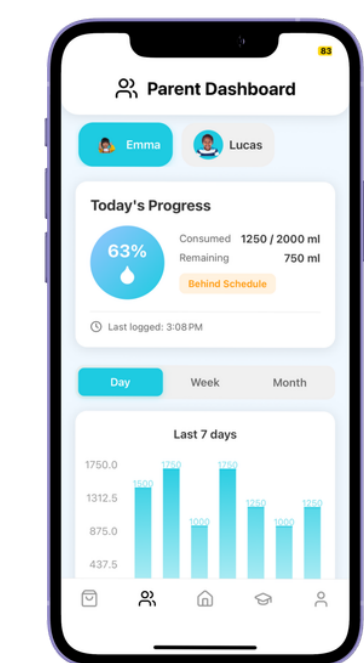

What is Cactus Buddies?

Cactus Buddies is an interactive hydration ecosystem designed to encourage healthy drinking habits in students through **Gamification** and **IoT** technology.

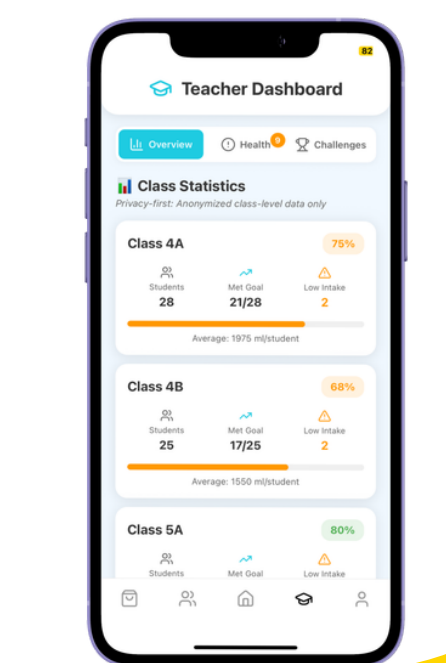

Hardware - Ecosystem

Parent UI

Teacher UI

Feeling thirsty at school

A quick tap

Realtime affect

My pet is growing

Meet goal get rewards – Worry free – Happy family

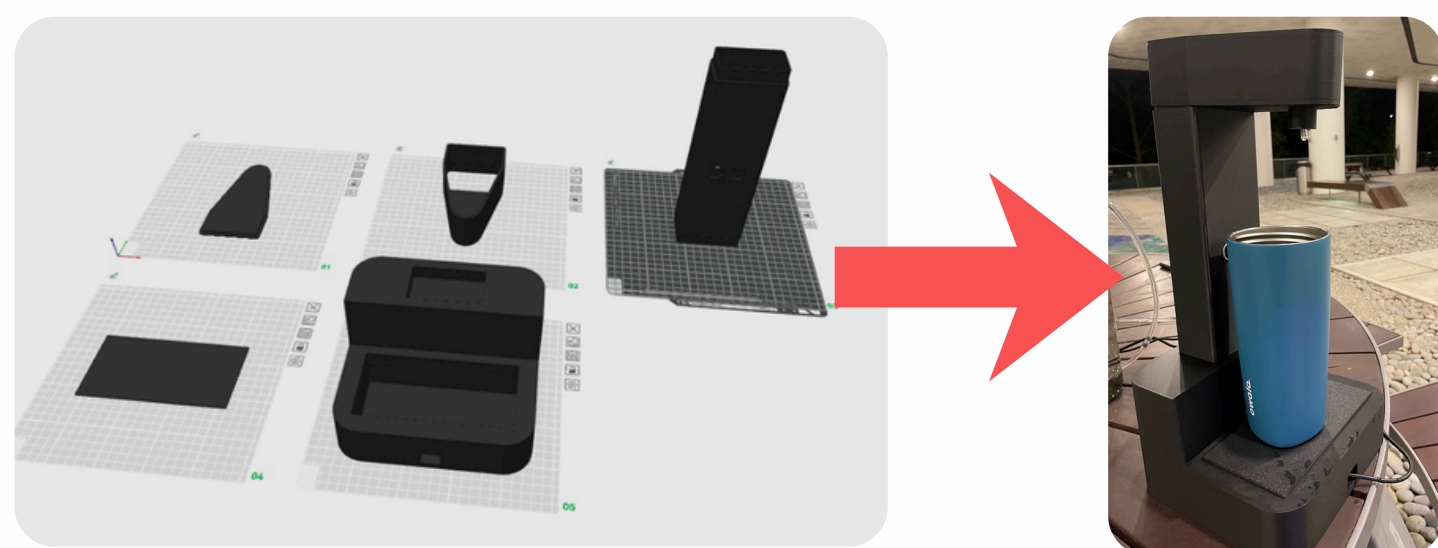

The First Solution combine 3 pillars

Engaging the child: Make water fun and desirable.

Automating the habit: Effortless tracking with smart tech.

Connecting the family/schools: Actionable parental/teachers insights

PROTOTYPE & TEST Water Dispenser

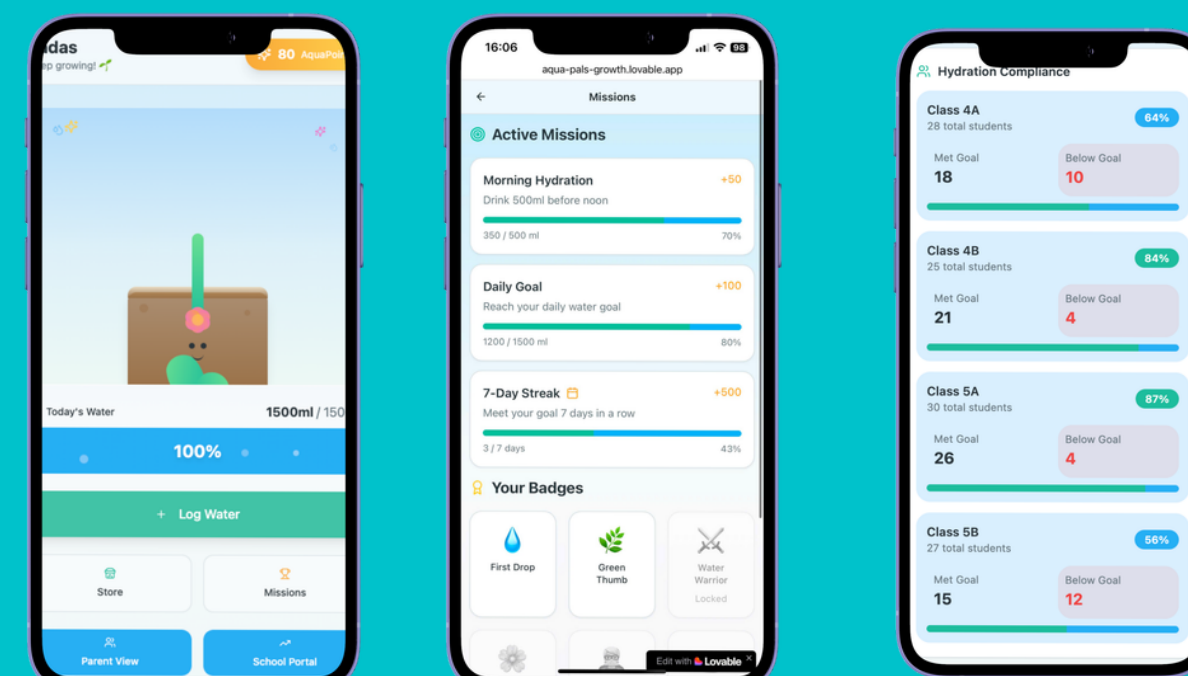

Transitioned 3D modeling to functional prototype.

Intergated Testing

- NFC identify user, automatically activated flow meter to precise volumn of water
- Real-time synced to Mobile App, trigger "Cactus Buddy" charater to growt

Version 01

Mobile Application

User Testing & Feedback (The Pivot)

Engagemenet gap: User found the static interface lacked motivation
Gamification Demand: Testers requested interactive elements and rewards
Monitor Dashboard
Parent and Teacher need a detailed dashboard to track children's progress and activity.

Version 02

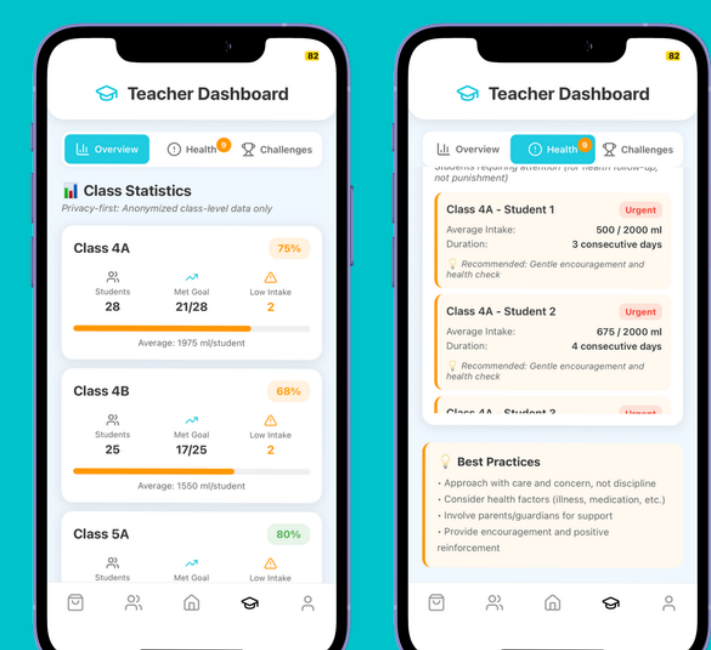

Student UI

Dynamic 3D plant animations

Streak tracker and shop

Teacher UI

Dashboard monitor hydration trends

Parent UI
